Altair Launches Mobile Application for Relocating Employees

PLANO, TX (October 3, 2012) – Altair Global Relocation announces the launch of Altair Anywhere™, a new mobile application that allows our clients' relocating employees to access and submit real-time relocation information anytime, anywhere. The features on Altair's STAR® web portal will now be available on any iPhone or iPad, with the added ability to photograph and upload receipts when submitting expense reports.

The new mobile app will be available from Apple's App Store free of charge to employees with access to STAR. Altair's Business Technology department is also developing an Android version of Altair Anywhere to be available by the end of 2012.

"I am pleased to announce the availability of Altair Anywhere, Altair's new mobile app," says Jason Beaudreau, Senior Vice President, Business Technology. "With the release of Altair Anywhere, we build on our industry-leading STAR technology platform to support employees during their relocation or while on assignment abroad."

"The dedication and effort put forth by our entire Business Technology department has resulted in a product that will streamline the relocation process for our clients and their employees," says Gail Plummer, CEO and co-founder of Altair. "The intuitive functionality of the mobile app is a shining example of our continued commitment to investment in technology."

Altair Global Relocation is an independent, full-service relocation management company offering a comprehensive selection of U.S. and international mobility solutions. Altair's clients are some of the most recognized names in today's global business community.

Founded in 1989, Altair is the largest certified woman-owned relocation management company and one of the largest relocation management companies based in the United States. Altair services are coordinated from U.S. regional service centers in Plano, Texas; Shelton, Connecticut; Walnut Creek, California; and Minnetonka, Minnesota; and from our EMEA and APAC regional service centers in London and Singapore. The global headquarters office is located in Plano, Texas.
